# **AILET -2013 Question Paper**

#### **SECTION – A : ENGLISH**

**Directions** ( $\mathbf{Q.1-6}$ ): The questions in this section is based on the passage. The questions are to be answered on the basis of what is **stated** or **implied** in the passage. For some of the questions, more than one of the choices conceivably answer the question. However, you are to choose the **best** answer; that is, the response that most accurately and completely answers the question.

Although the legal systems of England and the United States are superficially similar, they differ profoundly in their approaches to and uses of legal reasons: substantive reasons are more common than formal reasons in the United States, whereas in England the reverse is true. This distinction reflects a difference in the visions of law that prevails in the two countries. In England, the law has traditionally been viewed as a system of rules; the United States favours a vision of law as an outward expression of community's sense of right and justice.

Substantive reasons, as applied to law, are based on moral, economic, political and other considerations. These reasons are found both "in the law" and "outside the law" so to speak. Substantive reasons inform the content of a large part of the law: constitutions, statutes, contracts, verdicts, and the like. Consider, for example, a statute providing or purposes were explicitly written into the statute was to ensure quiet and safety in the park. Now suppose that a veterans' group mounts a World War II jeep (in running order but without a battery) as a war memorial on a concrete slab in the park, and charges are brought against its members. Most judges in the United States would find the defendants not guilty because what they did had no adverse effect on park's quiet and safety.

Formal reasons are different in that they frequently prevent substantive reasons from coming into play, even when substantive reasons are explicitly incorporated into the law at hand. For example, when a document fails to comply with stipulated requirements, the court may render the document legally ineffective. A Will requiring written witness may be declared null and void and, therefore, unenforceable for the formal reason that the requirement was not observed. Once the legal rule – that a Will is invalid for lack of proper witnessing – has been clearly established, and the legality of the rule is not in question, application of that rule precludes from consideration substantive arguments in favour of the Will's validity or enforcement.

Legal scholars in England and the United States have long bemused themselves with extreme examples of formal and substantive reasoning. On the one hand, formal reasoning in England has led to wooden interpretations of statutes and an unwillingness to develop the common law through judicial activism. On the other hand, freewheeling substantive reasoning in the United States has resulted in statutory interpretations so liberal that the texts of some statutes have been ignored.

#### SECTION D : REASONING

106. Information that is published is part of the public record. But information that a reporter collects, and sources that he contacts, must be protected in order for our free press to function free of fear.

The above argument is most severely weakened by which one of the following statements?

- (a) Public information is usually reliable
- (b) Undocumented evidence may be used to convict an innocent person
- (c) Members of the press act ethically in most cases
- (d) The sources that a reporter contacts are usually willing to divulge their identity
- 107. Psychological novels are superior to novels of adventure. Immature readers prefer novels of adventure to novels with less action and greater psychological depth. The immature reader, who prefers James Bond's exploits to the subtleties of Henry James, can be identified easily by his choice of inferior reading matter.

A criticism of the logic of this argument would be likely to find fault with the author's

- (a) Presupposing the conclusions he wishes to prove
- (b) Failure to define "adventure" clearly
- (c) Failure to cite possible exceptions to this rule
- (d) Hasty generalization on the basis of a limited specific case
- 108. Many very effective prescription drugs are available to patients on a "one time only" basis. Suspicious of drug abuse, physicians will not renew a prescription for a medicine that has worked effectively for a patient. This practice denies a patient her right to health. Which one of the following is a basic assumption made by the author?
  - (a) A new type of medicine is likely to be more expensive
  - (b) Physicians are not concerned with a patient's health
  - (c) Most physicians prescribe inadequate amounts of medicine
  - (d) Patients are liable to suffer the same ailment repeatedly
- 109. Vijay claimed that the large dent in the fender of the company-owned vehicle he had borrowed was caused by the careless act of another motorist, who backed into the car when it was parked in a public garage. Yet Vijay's own car has several dents in its fenders, all of which he acknowledges as having caused by his own careless driving. Therefore, Vijay's contention that the dent in the formerly undented company-owned vehicle was caused by the careless act of another person is not true?

The reasoning in this argument is vulnerable because it

- (a) Fails to recognize that Vijay could be lying about the dents in his own vehicle
- (b) Fails to recognize that the motorist who backed into him simply did not see him
- (c) Fails to acknowledge that many such accidents occur in parking garages
- (d) Presumes, without justification, that because Vijay has caused similar dents to his own car, he caused the dent in the company car
- 110. It takes a good telescope to see the moons of Neptune. I can't see the moons of Neptune with my telescope. Therefore, I do not have a good telescope.
